

# Plant Maintenance *Multi-Craft Capabilities*

Veolia Environmental Services Mechanical Services (VES) provides cost-effective maintenance services to numerous facilities in the petrochemical industry. These relationships have allowed us to develop a knowledge base and skill set that has enabled us to help our customers achieve increased productivity levels. We employ multi-craft technicians and insist upon the most rigid quality and safety standards.

Our experienced project management professionals work seamlessly with our craft personnel, forming a versatile team with cross-discipline capabilities.

As part of the world's largest environmental services company, VES offers a depth of experience unmatched by most other industrial service providers. The resources available to VES through its horizontal and vertical internal company relationships puts us in a unique position to meet your project needs. We are able to integrate core industrial services such as:

- Conventional hydro blasting
- Liquid and dry vacuum
- Chemical cleaning
- Project management

- Degassing
- Tank cleaning with a wide range of tools based on tank conditions/material
- Separations, dewatering, particle sizing of sludges
- Transportation and box management
- Disposal
- Onsite, long term sludge management

These capabilities place VES in an elite category among industrial service providers.

- Project Management
- Multi-Craft Personnel
- Emergency Deployment
- Turnkey Heat Exchangers
- Vessels, Drums, Towers & Heaters
- Code Repairs
- API 650 Tank Repair
- Pipe Fabrication and Repairs
