

## ■ Confined Space Standby & Rescue

The Emergency Response division of Veolia Environmental Services Special Services, Inc. (VES) offers complete turnkey confined space rescue ability and standby service that fully meets OSHA 1910 and 1914 Confined Space regulations and requirements. Our professional responders, technicians and managers are fully trained to comply with state and federal regulations and are available to our customers on a priority basis under a **Confined**

**Space Planning, Training and Response Assistance Agreement.**

VES managers and rescue experts will work with your managers, safety staff and line personnel to **identify and help prevent problems before they occur.** We will review your safety and rescue equipment, develop and supervise on-site and pre-job safety briefings and help with confined space rescue scenario planning. Federal OSHA 1910 rules require employers to assure that rescue personnel or rescue service providers are properly trained and equipped, and that they meet appropriate performance standards.

VES rescue and standby rescue teams are prepared to conduct OSHA 1910 compliant work area access that entails descent, retrieval, **ascent and traversing rope systems.** This rescue system work involves the use of

specialized rope techniques and equipment to provide workers with access to **elevated platforms** and other difficult locations.

Rescue standby systems, properly conducted, will include the use of redundant systems, appropriate fall prevention and retrieval systems assuring the use of safe and compliant techniques.

VES professional rescue personnel are also trained to deploy lowering and raising systems to facilitate access by special skills personnel (project managers, engineers or inspectors) who are not likely to have the necessary rope access skills to independently access a work area.

## ■ Why Veolia ES Emergency Response?

- Rapid Response - On Time
- Experience and Expertise
- Financial Stability
- Wide Range of Services
- Regulatory Compliance

- PRE-PLANNING ASSISTANCE
- PROFESSIONAL RESCUE STAFF
